

NELLI ARAVIND

Technical Support Engineer | CEH Certified | Windows, Networking & Security Support

Hyderabad, Telangana | +91 6309579202 | naiduaravind169@gmail.com | GitHub: Aravindnelli-ceh

Immediate Joiner | Open to Visakhapatnam / Relocation | Rotational 24/7 Shifts, Weekends & On-Call | English, Telugu, Hindi

PROFESSIONAL SUMMARY

EC-Council Certified Ethical Hacker (CEH) and Technical Support Engineer with 3 years of SLA-driven ticket handling and support (1.5 years in application support and 1.6 years in a government network project as L1/L2), plus 6 months as a Cybersecurity Intern. Skilled in troubleshooting Windows, Linux, and network issues (TCP/IP, DNS), with working knowledge of Azure, Intune, Active Directory, VMware, and Citrix, researching software and hardware faults, log analysis, root cause analysis, and escalating with complete documentation. Comfortable with after-hours, weekend, and on-call rotations; focused on customer satisfaction.

CORE SKILLS

Support & Troubleshooting: Windows and Linux troubleshooting, software/hardware issue research and resolution, incident and service request lifecycle, root cause analysis, L1 to L2/NOC escalation, SLA tracking, customer communication, requirement gathering, product demonstrations, performance reporting

Systems & Endpoint (basic working knowledge): Microsoft Azure, Microsoft Intune (MDM and device enrollment), Active Directory, VMware, Citrix Workspace, RDP-based applications

Networking: TCP/IP, DNS, DHCP, VLAN, PPPoE, site-down and connectivity diagnosis, Ping, Traceroute, NSLookup, Wireshark, MikroTik routers/switches, PuTTY, Winbox, CDN performance monitoring

Security: CEH, SIEM alert triage, log analysis, IDS/IPS, Firewall and Proxy concepts, EDR and DLP concepts, phishing and brute-force detection, Nessus, Nmap, MITRE ATT&CK, OWASP

Platforms & Operations: TotalView Corpus CRM, OneRadius (partner creation, package price mapping, error-code resolution, API checks), DRM middleware, CDN, OTT platforms (Bundler, Watcho, Playbox), MSO operator coordination

Tools & Scripting: ITSM/CRM tools (TotalView, Sugar CRM, Mitra, SSCSmart), REST API/JSON validation, Core Python, Basic SQL, MS Office

PROFESSIONAL EXPERIENCE

Engineer – Networking | SPOC Lead, Lytus Sri Sai Networks Pvt. Ltd. (T-Fiber Project)

Jan 2025 – Jul 2026

- Handled 50–70 tickets per day through the full incident lifecycle (log, triage, investigate, resolve, escalate, close) in TotalView, Mitra, STB App, and SSCSmart within SLA.
- Diagnosed network and application issues using Ping, NSLookup, Traceroute, PuTTY, and Winbox; configured MikroTik routers and switches and identified site-down causes; ran root cause analysis on recurring incidents to prevent repeats.
- Analyzed DRM, sync, and authentication logs and validated JSON/API responses to isolate failures; coordinated fixes with backend and development teams.
- Escalated qualified incidents to L2/NOC with full documentation; monitored CDN performance with ObserveEye and produced daily, weekly, and monthly reports.
- Primary contact for clients, vendors, BDMs, and MSO operators; delivered product demos and closed action items to improve customer satisfaction.

Application Support Engineer & Coordinator, Bissi Yaazi Technology (Payzo Partner App)

Jul 2023 – Dec 2024

- Handled customer tickets within SLA timelines, tracking each issue from logging to resolution and closure in Sugar CRM and Mitra ticketing tools.
- Provided application support for the Payzo partner application, resolving customer-reported issues over chat, email, and voice.
- Worked as coordinator with Vyshnavi Chenna and Yaazi (Co-founder), reproducing issues, documenting findings, and tracking escalations through to closure.

Cybersecurity Intern

6 months

- Analyzed logs and correlated SIEM alerts across simulated events to detect suspicious activity; investigated failed-login patterns and triaged alerts.
- Combined SIEM monitoring with DNS filtering to detect phishing, brute-force, and anomalous login activity (Zero Trust lab).
- Followed the incident response workflow (detection, investigation, response, documentation) and applied MITRE ATT&CK concepts to describe attacker behavior.

PROJECTS

- Corpus IPTV Operations: API validation, JSON verification, and CRM and DRM support.
- T-Fiber Government Project: worked as SPOC Lead for clients, vendors, and internal teams.

EDUCATION & CERTIFICATIONS

- EC-Council Certified Ethical Hacker (CEH), issued 30 Oct 2025, Certification No. ECC3691802457
- CEH v12 Training (Certificate of Attendance), Hacker School, EC-Council Accredited Training Center, Nov 2024
- B.Tech, Mechanical Engineering, Avanthi Engineering College, Visakhapatnam, 2019 – 2023
